Education

Johns Hopkins University - Bioinformatics, M.S. (2022)

University of California, San Diego - Biophysics, B.S., Entrepreneurship, Minor (2018)

Experience

Data Scientist

Los Angeles, CA Mar. 2025 - Present

University of California, Los Angeles (UCLA Health)

- Applied regression and clustering analysis on single-cell protein data with R & Bioconductor.
- Built mass CyTOF analysis pipeline using R and CATALYST to process flowset lung cancer single-cell protein data.
- Performed spatial transcriptomic clustering analysis on HPC cluster to analyze scRNA-seq data, providing insights into lung cancer gene expression.
- Processed Multiplex Immunofluorescence (MIF) data, enabling cellular profiling and spatial analysis.
- Generated detailed, presentable data visualizations with R to communicate findings.

Analytics Engineer

Boston, MA Dec. 2024 - Mar. 2025

Pure Lithium Corporation

Developed scalable data models using Snowflake SQL queries and Data Build Tool (DBT) to support company data infrastructure.

- Created interactive dashboards on Hex & Streamlit to deliver key product performance insights for stakeholders.
- Managed Prefect flows deployed on AWS, enabling distributed ETL processes.

Data Scientist

Long Beach, CA

Nov. 2023 - Nov. 2024 SCAN Health Plan

- Developed SQL queries on the Microsoft Azure to analyze high dimensional EHR data, enabling insights into healthcare trends and client behavior.
- Led development of CART and Deep Neural Network classifiers using Scikit-Learn and PyTorch to predict medication non-adherence patients.
- Deployed machine learning models to production and evaluated their performance using AUC-ROC curves to improve identification of members eligible for healthcare plans.

Clinical Programming Analyst

Irvine, CA

Edwards Lifesciences (Contract)

Oct. 2023 - Nov. 2023

- Ensured consistent schema of KPI dataset through appropriate data validation and preprocessing using PySpark.
- Optimized interactive data visualizations by enhancing Python Dash Plotly dashboards, improving usability for clinical stakeholders.

Data Scientist

Bio-Rad Laboratories

Irvine, CA

Sep. 2023 - Oct. 2023

- Developed SQL queries in Snowflake to accelerate dataset preparation for PowerBI dashboards built using DAX language.
- · Conducted profit margin analysis across the company's product portfolio to identify actionable KPIs, improving product strategy.

Data Scientist

Laurel, MD Aug. 2022 - Jul. 2023

The Johns Hopkins University Applied Physics Laboratory

- Built a scalable ETL data pipeline in Python to preprocess environmental sensor data from hospital operating rooms.
- Developed regression and clustering models to predict hazardous operating room conditions, improving patient safety protocols.
- Leveraged High Performance Computing (HPC) clusters with SLURM on Linux to run SARS-CoV-2 protein-protein docking simulations.
- Analyzed Covid-19 personal protective equipment inventory using PySpark, identifying supply chain bottlenecks.

Machine Learning Engineer Intern

Silver Spring, MD Jun. 2020 - Aug. 2020

3M

- Leveraged PySpark and NTLK on AWS to preprocess large-scale parquet text files containing medical records.
- Designed NLP models to generate text embeddings of ICD-10 medical codes, enhancing medical code recommendation accuracy.

Projects

Cancer Tissue Detection:

Developed a PyTorch CNN with transfer learning on CUDA to classify 200K tissue images as cancerous or benign, achieving 86% accuracy.

Skills

Technologies: Python, R, Java, HTML/CSS/Javascript, Scikit-Learn, Pandas, Numpy, Tensorflow, PyTorch, PyKeen, Optuna, Jupyter Notebook, OpenCV, SQL, PySpark, Git, Amazon Web Services, Microsoft Azure, Snowflake, DBT, HPC, SLURM, Tableau, PowerBI, Hex

Knowledgeable: Predictive Modeling, Statistical Analysis, Deep Learning, Knowledge Graph Embeddings, Natural Language Processing, Time Series Forecasting, Computer Vision, A/B Testing, Feature Engineering, Data Visualization, Communication, Self-Motivation, Empathy
